SUMMARY

Front-end Developer & UI Designer with 10+ years of experience in web development and enterprise software engineering.

Adept in React, TypeScript, CSS, UI/UX Design, and REST APIs, with a strong focus on responsive layouts, performance, cross-browser compatibility, and accessibility.

EXPERIENCE

Software Engineer II

NIKE - Jan. 2023 to Present

Worked as a Digital Innovator in the LeBron James Innovation Center building design software and tools for Nike product prototyping and manufacturing. Also worked on various Nike Global Technology teams.

- Built proprietary design software and tools for product prototyping.
- Built pixel-perfect, custom UI components designed in Figma.
- Developed with React, TypeScript, Tailwind, Emotion, REST APIs.

Front-end Developer / UI Designer

FREELANCE - Jul. 2018 to Jan. 2023

Designed and built a fully-custom Next.js CMS application for my personal portfolio, amirardalan.com. Built small and medium size websites.

- <https://github.com/amirardalan/amirardalan.com>
- Specialized in Next.js / React, UI design and Emotion CSS
- Focused on responsive UI design and cross-browser compatibility

Lead UI Engineer

KEEN FOOTWEAR - May 2015 to Jul. 2018

Wrote HTML, CSS, and JavaScript for custom Salesforce Commerce Cloud E-Commerce implementations. Led day-to-day operations for KEEN Footwear and Chrome Industries content delivery team.

- Managed a team of five front-end and content developers
- Implemented custom UI modules and localized content.
