PROFILE

Front-end Developer & UI Designer with 10+ years of experience in web and enterprise software development.

Adept in React, TypeScript, CSS, and UI design, with a strong focus on responsive and user-centric design, performance, cross-browser compatibility, and accessibility.

EXPERIENCE

◯ SOFTWARE ENGINEER II

NIKE - Jan. 2023 to Present

Worked as a Digital Innovator in the LeBron James Innovation center building design software and tools for Nike product prototyping and manufacturing. Also worked on Nike Global Technology teams.

- Built proprietary design software and tools for product prototyping.
- Implemented custom React components for large data sets.
- Coded using React, TypeScript, Tailwind, and Styled Components.

◯ FULL-STACK ENGINEER & UI DESIGNER

FREELANCE - Jul. 2018 to Jan. 2023

Designed and built a fully-custom Next.js CMS application for my personal portfolio, amirardalan.com. Built small and medium size websites.

- https://github.com/amirardalan/amirardalan.com
- Specialized in Next.js / React, UI design and Emotion CSS
- Focused on responsive UI design and cross-browser compatibility

◯ LEAD UI ENGINEER

KEEN FOOTWEAR - May 2015 to Jul. 2018

Wrote HTML, CSS, and JavaScript for custom Salesforce Commerce Cloud E-Commerce implementations. Led day-to-day operations for KEEN Footwear and Chrome Industries content delivery team.

- Managed a team of five front-end and content developers
- Implemented custom UI modules and localized content.
